

COLFAX — GUARDS + AI

SUMMIT FORCE SECURITY GROUP · PLACER COUNTY · PPO #122730

There is no security without both: analytics never blink, licensed officers verify and respond. This is how that pairing runs in Colfax.

LOCAL SNAPSHOT

Colfax is a scheduled-coverage market. Response times from the valley are honest ones — we schedule Colfax patrols as planned passes and standing posts rather than pretending we can be there in ten minutes, and we say so up front.

Most-called problem: break-ins at seasonally vacant properties and after-hours Main Street activity. **Demand profile:** small-town main street commercial, storage, vacation and seasonal properties.

AI WATCHES

Analytics hold the overnight line on Main Street, South Auburn Street, Canyon Way — line-crossing, loitering, vehicle dwell and after-hours motion, escalated the moment a rule trips.

OFFICERS RESPOND TO

Break-ins at seasonally vacant properties and after-hours Main Street activity, door pulls and lot sweeps, contact with trespassers, lighting failures, and photo-verified documentation on every stop.

DISPATCH & RESPONSE

Roughly 50 minutes from Sacramento HQ; scheduled foothill coverage rather than immediate emergency response.

NEIGHBORHOODS COVERED

Downtown Colfax · Cape Horn · Iowa Hill Road corridor. Marked-vehicle routes with time-stamped checkpoints.

DETECT / VERIFY / RESPOND / DOCUMENT

1. DETECT

Cameras + analytics flag motion, dwell or a crossed line in seconds.

2. VERIFY

A human confirms intent — no dispatch wasted on cats, wind or shadows.

3. RESPOND

A marked Colfax unit arrives, makes contact and clears the property.

4. DOCUMENT

Photo-verified report to you, and to law enforcement when needed.

WHERE CAMERAS ALONE FAIL

- Nobody is watching the feed at 3 a.m.
- Footage proves the loss — it doesn't prevent it.
- No lawful presence to ask a trespasser to leave.
- No lighting, gate or door-check on the ground.
- Police response is triaged behind higher-priority calls.
