

GRASS VALLEY — GUARDS + AI

SUMMIT FORCE SECURITY GROUP · NEVADA COUNTY · PPO #122730

There is no security without both: analytics never blink, licensed officers verify and respond. This is how that pairing runs in Grass Valley.

LOCAL SNAPSHOT

Grass Valley's historic downtown packs retail, restaurants and lodging into narrow blocks with alleys and rear entries that never get seen from the street. Add the Brunswick Road commercial basin and you have two different patrol problems in one town.

Most-called problem: alley and rear-entry activity behind historic downtown storefronts. **Demand profile:** historic downtown retail, medical and commercial centers, events and lodging.

AI WATCHES

Analytics hold the overnight line on Mill Street, East Main Street, Brunswick Road — line-crossing, loitering, vehicle dwell and after-hours motion, escalated the moment a rule trips.

OFFICERS RESPOND TO

Alley and rear-entry activity behind historic downtown storefronts, door pulls and lot sweeps, contact with trespassers, lighting failures, and photo-verified documentation on every stop.

DISPATCH & RESPONSE

About an hour from Sacramento HQ — scheduled patrol, standing posts and contracted event coverage.

NEIGHBORHOODS COVERED

Downtown Grass Valley · Brunswick Basin · Alta Sierra corridor. Marked-vehicle routes with time-stamped checkpoints.

DETECT / VERIFY / RESPOND / DOCUMENT

1. DETECT

Cameras + analytics flag motion, dwell or a crossed line in seconds.

2. VERIFY

A human confirms intent — no dispatch wasted on cats, wind or shadows.

3. RESPOND

A marked Grass Valley unit arrives, makes contact and clears the property.

4. DOCUMENT

Photo-verified report to you, and to law enforcement when needed.

WHERE CAMERAS ALONE FAIL

- Nobody is watching the feed at 3 a.m.
- Footage proves the loss — it doesn't prevent it.
- No lawful presence to ask a trespasser to leave.
- No lighting, gate or door-check on the ground.
- Police response is triaged behind higher-priority calls.
